## PERSONAL SUMMARY

Have 2 years professional web & software development experience in fast-paced, multi-cultural work environment both locally and overseas. Have proven outstanding analytical and problem-solving skills. Passionate about learning and adapting new technologies and enjoy understanding how things can be used in different approaches to achieve desired goals. Love to collaborate with team and self-driven when assigned to work on independent tasks.

## WORK EXPERIENCE

### WEB & SOFTWARE ENGINEER

*TIMEREC LTD | MAR 2019-MAR 2021*

- Developed Front-end user interface of a location-based social media mobile application across multiple platforms.
- Collaborated on Back-end development of API's, implement cloud services, monitor and manage database.
- Developed backstage management system for the organisation.
- Independently developed cross-platform projects in Full-stack .

## PROJECT EXPERIENCE

### *Timerec Cloud – Web Application*

The project is to build a backstage management system for managing all **software services**, analyse and visualise data from database.

Developed Front-end using Vue, Element-ui, ECharts.

Backend REST API's in Java using Spring Cloud, Spring MVC + MyBatis framework and managed MySQL database.

### *POP H5 – Front-end and Web Services*

The project is to develop all the cross-platform components of a mobile app.

Independently developed Web Front-end by using HTML5 & SASS, Vue, Vant.

Remotely collaborated in developing Back-end API's in Java using Git for source code version control.

### *Merchant Panel - Software Front-end*

Developed a management system (mini program) for business clients of Timerec.

Independently developed Cross-platform Front-end by using Apache Weex, uni-app and adopted Google API's for location related services.

### *POP Shop - Software Front-end*

Developed an e-commerce system (mini program) within the POP app.

Independently developed Back-end REST API's in Java and using Vue.js, uni-app for Front-end development.

And more ...
